## **Apply**

Parametric design unlocks an infinite number of patterns. These are easily applied to the full range of sizes and shapes in our collection. As a result, you are free to choose both the size and shape of planter, as well as the surface finish you prefer.

# UNIQUE COLORS

## Infuse

With the addition of pigments, we will be able to add color to our concrete mixtures. We are still in the R&D phase of this development but expect to be able to apply everything from deep earth tones to multicolor gradients.

# PICK YOUR **SCALE**

**sc00** 500x380mm

**sc01** 750x550mm

**sc03** 1100x750mm

**sc04** you choose

## Resize

With concrete 3D printing, size and shape are no longer constraints but have become opportunities for your space. We have a standard range of sizes which can be adjusted upon request.

# Infinite

## “Inspiration”

Joseph Monier – (pronunciation French: [monje])  
In his work as a landscape architect, Monier struggled to find suitable materials for his planters. Clay was fragile, wood weathered and concrete was brittle. He experimented with iron mesh and pouring concrete. With this, he became one of the principal inventors of reinforced concrete and radically changed the built environment.

In a similar spirit of innovation, we want to introduce a new design aesthetic to the built environment and where else to start than with planters.

## Technology

We believe that 3D printing is the key to unlocking the potential of the parametric design aesthetic. We want to lead this trend of breaking with minimalism and embracing the diversity, distinctiveness, variation and splendour that makes our world beautiful.

We are a growing company with an industrial background. We make contemporary planter solutions for the design professionals that correspond to modern architectural spaces and improve our daily surroundings with plants.
